Charlie

Can you send Jason the Letter to the Editor we sent out? It will summarize some of the backstory, at least on the meconium front.

David Hutchins and McDermott are up to their old ways. Any chance on tracking their funding?

Thanks

PARTICIPANTS NEEDED

A research study at the University of South Carolina is recruiting families to participate in a Pilot Study in Montana using Buccal Cells in Humans. The purpose of the study is to better understand the educational and health outcomes of children who may have been exposed to metals in the environment. Participation will be confidential and the recruiter can meet you at your home or another agreeable location to conduct the study procedures.

Who is Eligible for the Study?

- Children between the ages of 4 and 11 years plus one of their biological parents
- The child must have lived his or her entire life in one of the Montana towns of Butte or Anaconda or Missoula

We are offering \$30 per family as an incentive for participation.
